

REGISTRATION

Program Registration Fee **\$150.00**

Early Bird Fee for WHEA Members
\$120.00

If you are a WHEA member, you may take advantage of this "members only" registration fee until February 2.

The registration fee covers the cost of the program, refreshments, lunch and materials. Online registrations only at www.whea.com. A registration confirmation/invoice will be emailed to you once you register. ***If you do not receive this confirmation within one week after registering, contact the WHEA Administrative Assistant.*** The registration fee must be paid in full by the start of the program. Credit cards accepted. Walk-ins are discouraged and are not guaranteed program materials.

CANCELLATIONS / REFUNDS

A non-refundable charge of \$50 will be made for any cancellations made after February 9, 2010. There will be no refunds after the start of the program. If the program is cancelled, refund is limited to the program fee.

COURSE CONTENT

This program will begin with a competency-based training program on Firestop. Firestop products are highly dependent on proper design and installation for success in an actual fire. They are the only code required life-safety item installed by every trade. This program was created in response to the growing demand for training. This basic competency course is an in-service training and includes an exam. Certificates will be issued for those who pass, which expire every two years. This course is excellent for designers, installers, code compliance officers and anyone seeking a basic understanding of firestopping. This program is non-proprietary to specific brands. It will include the following:

- How firestop works
- How firestop is tested
- Fire protection fundamentals
- Firestopping penetrations
- Fire rated construction
- Construction joints
- Perimeter fire containment

We will finish up with a demonstration of the proper installation of Underwriters Laboratories (UL) approved life safety dampers as well as optional ease of use installation methods available for Greenheck life safety dampers. Inspection requirements of life

COURSE CONTENT *(continued)*

safety dampers will be reviewed. In addition, we will cover common mistakes associated with life safety damper installation and troubleshooting of inoperable life safety dampers.

PROGRAM AGENDA

AM

- 7:45 - 8:30 Registration
8:30 - 10:00 Firestop
10:00 - 10:15 Morning Break
10:15 - 11:30 Firestop

LUNCH

11:30 - 12:30

PM

- 12:30 - 1:30 Firestop
1:30 - 1:45 Afternoon Break
1:45 - 3:00 Fire & Smoke Dampers
3:00 - 3:30 Question & Answer

PROGRAM PRESENTERS

Jeremy Brang, Territory Manager, Specified Technologies Inc. (STI)

STI has become well known for understanding of the life safety requirements in hospitals and how changes in the Joint Commission effect planning of facility projects. An addition to implementing firestop programs and product solutions to meet the unique needs of healthcare including compliance with the Joint Commission, code compliance, infection control, and patient privacy.

Michael G. Kluck, Product Manager- Life Safety Dampers, Greenheck Corp.

Michael has a Bachelor of Science degree in Environmental Engineering from the University of Wisconsin-Platteville. He has 10 years of experience in sales, marketing, and applications at Greenheck starting as a Product Specialist in the Fan and Vent group before transferring to a similar role in the Damper group and working up to his current position. Michael's responsibilities include managing the life safety damper product line and applications for those products while focusing on top-line growth in the mechanical rep channels and steering the market segment team in customer support, case studies, product development, promotions and profitability. Michael is a member of NFPA, AMCA and ASHRAE as well as a corresponding member of ASHRAE TC5.6 Control of Fire and Smoke. Michael has presented numerous topics involving Dampers at AMCA and ASHRAE Technical Seminars. Michael has also presented seminars on Dampers both domestically and Internationally.
